

comprising the step of administering to said human or animal an immunogenic composition comprising an antigen of an inactivated or attenuated virus and a hemagglutinin, whereby a humoral immune response specific for the antigen is induced.

Sub. E1 63. (New) The method of claim 62 wherein said hemagglutinin is a viral hemagglutinin.

64. (New) The method of claim 63 wherein said hemagglutinin is from an orthomyxovirus or a paramyxovirus.

65. (New) The method of claim 64 wherein said hemagglutinin is from influenza virus.

66. (New) The method of claims 63 or 65 wherein said hemagglutinin is comprised within an inactivated influenza virus.

Q1 67. (New) The method of claim 62 wherein said virus is inactivated with formalin or beta-propiolactone.

68. (New) The method of claim 62 wherein said virus is an enveloped virus.

69. (New) The method of claim 68 wherein said enveloped virus is selected from the group of inactivated or attenuated viruses consisting of simian immunodeficiency virus, human immunodeficiency virus, feline immunodeficiency virus, or bovine immunodeficiency virus, rabies virus, measles virus, vesicular stomatitis virus, flavivirus, alphavirus and herpes virus.
